Drawings

1. The drawings were received on 8 August 2005. These drawings are approved.

Claim Objections

2. Claims 1-7 are objected to because of the following informalities: In line 8 of claim 1, the term "coupling" should be replaced with the phrase --being coupled--.

It is suggested that the term "luminescence" should be replaced with the term --luminescent-- in line 1 of claims 2-7.

It is suggested that the phrase "at its center comprises a circular hole" be replaced with the phrase --includes a centrally located circular hole-- or an equivalent in line 2 of claim 2.

The term "a" should be replaced with the term --an-- prior to the term, "upper" in line 2 of claim 4.

These changes are for grammatical clarity and to more clearly describe the invention. Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

4. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 is indefinite due to the fact that it is unclear

Art Unit: 3617

what is actually being claimed by the phrases "on its end surface having a plurality of insert holes" and "luminescence effect". No "end surface" has been positively described in the claim to allow one of ordinary skill in the art to determine where the insert holes are located.

Claims 3-4 are indefinite due to the fact that it is unclear whether the "end surfaces" described in these claims are the same element as the "end surface" set forth in claim 1, or are additional elements of the invention.

Claim 4 is indefinite due to the fact that it is unclear what element of the invention includes a "right end surface" as set forth in line 3 of the claim.

Claim 7 is indefinite due to the fact that it is unclear whether the "latch base", "upper latch base", "lower latch base", or plastic optical fiber structure "base" is being referred to by the phrase "said base" in line 2 the claim.

5. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

For example, it is generally unclear what is actually being claimed by lines 9-12 of claim 1, due to language that appears to be a literal translation from a foreign document.

Art Unit: 3617

6. Claim 7 recites the limitation "luminescence structures" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim. This limitation has not been previously set forth in the claims.

Allowable Subject Matter

7. As best understood, claims 1-7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
